DETAILED ACTION

Claims 7 and 9 have been cancelled. Claims 1 and 8 have been amended.
Claims 10-18 are newly added.

Specification

Applicant has corrected the informalities as objected to for the specification. The objection is hereby withdrawn.

Claim Rejections - 35 USC § 112

Applicant's amendment has overcome the 112 rejections made in the previous office action; those 112 rejections are hereby withdrawn.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, words appear to be missing after "claim 10" at line 1 and in subparagraph (a). Claims 1-6 and 8 are drawn to an apparatus, but dependent upon claim 10 which is drawn to a method. It is unclear how the apparatus functions from the method.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8 and 10-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Joao, USPN 6,283,761 in view of McIlroy et al., USPN 5,953,704, Lavin et al., USPN 5,772,585, or Iliff, USPN 6,206,829.

Claims 1-6, 8 and 10-18 are rejection as substantially applied in the previous office action. Applicant has indicated that the claims are now drawn to "health care plans" and would overcome the art rejections. However, it is unclear as to how such claim language would overcome the prior art since the prior art all disclose treatments for health problems and so would read on such claim language. See for example, Joao at abstract where it is indicated that healthcare information, healthcare theories and diagnostic reports are provided to individuals seeking health care.

It appears that claim 10 further adds language at subparagraph (d) about means to update patient data. This feature, updating history, is well known in the prior art as, and shown in the prior art as applied. See for example, Joao at col. 19 lines 54-64.

As to new claims 11-18, these claims are placed in method steps instead of apparatus format of claims 2-9 which were applied in the previous office action. Since the underlying steps were treated in the previous office action for claims 2-9, the rejection is incorporated herein.

Response to Arguments

See above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
